**Intermediate Software Developer | Full-Stack Web & Mobile App Developer | JavaScript | Laravel
| React | Process Improvement & Digital Innovation).**

EXECUTIVE SUMMARY

Process-driven and highly technical Software Developer with over 5 years of experience in software engineering, web development, and mobile application development. Proven ability to design, build, test, deploy, and maintain scalable software systems that enhance operational efficiency and support business growth.

Experienced in translating complex user requirements into functional solutions using modern programming frameworks and best practices. Strong expertise in JavaScript, PHP (Laravel), React Native, Ionic, SQL, and WordPress, with a demonstrated track record of delivering secure, responsive, and high-performing applications.

Recognized for applying process improvement strategies, automating manual tasks, optimizing system resources, and driving innovation through emerging technologies. Adept at collaborating with cross-functional teams and stakeholders to deliver solutions that align with business objectives and user needs.

PROFESSIONAL EXPERIENCE

Southern Oil Pty (SOILL)

Software Developer

January 2023 – Present

RESPONSIBILITIES:

Software Design & Development:

- Translate user and business requirements into technical specifications using Laravel and PHP-focused architecture patterns (e.g., MVC, service-repository pattern).
- Develop robust software solutions with Laravel (Eloquent ORM, Blade, Queues, Events) and modern PHP (PHP 8+ features, type hinting, dependency injection).
- Design modular, scalable applications that eliminate manual processes and improve operational efficiency.

Testing, Deployment & Support:

- Perform rigorous testing using PHPUnit, Pest, and Laravel's built-in testing utilities to identify and resolve logic or programming flaws.
- Deploy solutions through Dev → Test → Live environments using Laravel environment configuration, database migrations, and seeders to ensure stability and compliance.
- Provide ongoing maintenance and upgrades to existing Laravel systems, leveraging Composer for dependency management and Laravel's upgrade guides for version transitions.

Process Automation & Optimization:

- Build automation tools within Laravel (e.g., Artisan commands, scheduled task scheduler, job queues with Redis/Database) to replace repetitive manual tasks in the Analyst Department.
- Streamline workflows using Laravel workflows, custom console commands, and background processing to enhance departmental performance and productivity.
- Continuously improve solutions based on user feedback and business needs.

TNG Solutions

Intermediate Software Developer

March 2022 – August 2022

RESPONSIBILITIES:

Full-Stack Application Development:

- Developed, tested, and maintained client software using the LAMP technology stack within an MVC framework.
- Built robust internal applications ensuring scalability, functionality, and performance.

Database Engineering & API Development:

- Designed relational databases and wrote complex MySQL queries for internal systems.
- Developed APIs using Laravel PHP Framework for enterprise applications.

Mobile Application Development:

- Designed and implemented security and mobile app frontends including FASPRO24 applications.
- Built interfaces using Ionic React and Ionic Angular platforms.

Collaboration & Documentation:

- Documented application functionality and SOPs to support business processes.
- Collaborated with development and testing teams to deliver client-focused solutions.

Tools Used: Ionic Angular, Ionic React, Laravel 8, MySQL, GitHub, Trello, Capacitor, Cordova, VS Code

Moody And Smith Digital

Junior Software Developer

January 2021 – December 2021

RESPONSIBILITIES:

Web Development & Front-End Engineering:

- Developed 15+ WordPress websites from concept through deployment.
- Designed responsive web applications using CSS and Bootstrap frameworks.
- Maintained front-end code quality and enforced documentation standards.

Back-End Security & Maintenance:

- Implemented PHP back-end programming to improve website security and integrity.
- Supported deployment and maintenance of client-facing web solutions.

The Braveladies Trading

Web Developer

January 2020 – December 2020

RESPONSIBILITIES:

Website Development & UI Design:

- Collaborated with marketing teams to design web pages aligned with organizational goals.
- Developed websites using HTML, CSS, JavaScript, and jQuery.

Back-End Development & E-Commerce Support:

- Determined coding requirements including e-commerce functionality and security.
 - Oversaw PHP back-end development ensuring site efficiency and reliability.
-

Sinansel Tisa Consulting CC

Web Developer

April 2018 – January 2020

RESPONSIBILITIES:

Front-End Development & CMS Management:

- Delivered front-end website solutions using WordPress and HubSpot tools.
- Conducted testing for responsiveness, usability, and performance.

Technical Troubleshooting & Client Support:

- Resolved technical programming issues and provided troubleshooting support.
 - Gathered and translated user requirements into implementation plans.
-

Semlex

Programming Intern

March 2017 – February 2018

RESPONSIBILITIES:

Systems & Data Management:

- Implemented innovative systems for customer data collection, storage, and management.

Testing & Technical Support:

- Performed troubleshooting and hardware testing to identify system issues.

Software Collaboration & Development:

- Supported development teams in building scalable solutions using React Native and Node Server.
 - Assisted in database design and application development using MySQL.
-

EDUCATION & QUALIFICATIONS

- Advanced National Diploma: Business Information Technology, **University of Johannesburg** | 2021
 - Bachelor of Science: Computer & Information Sciences, **American International University West Africa** | 2017
-

SKILLS AND COMPETENCIES

Programming & Development:

- JavaScript | PHP | SQL | HTML5 | CSS3
- React Native | Ionic Angular | Ionic React
- Laravel Framework | Node.js | React

Web & CMS Platforms:

- WordPress Development
- HubSpot Web Tools
- Bootstrap | jQuery

Database & Systems:

- MySQL Database Design & Queries
- API Development & Integration
- IT Infrastructure & Enterprise Solutions

- SQL Server Management Studio

Tools & Environments:

- Visual Studio Code
- GitHub Version Control
- PhpStorm
- Trello Agile Collaboration
- Linear
- Notion
- Capacitor & Cordova

Additional Competencies:

- Organized and methodical approach to software engineering
- Strong analytical and logical reasoning ability
- Proactive problem-solving mindset
- Excellent verbal and written communication
- Adaptable, curious, and committed to continuous learning

Key Achievements:

- Developed and deployed software solutions that automated manual analyst workflows, improving efficiency.
 - Created 15+ professional WordPress websites with secure and responsive design.
 - Designed and implemented mobile application frontends for enterprise security systems.
 - Delivered API solutions using Laravel to enhance internal application integration.
 - Strong record of collaborating across teams to meet client requirements for performance and scalability.
